

GENIUS CUSHION

GALLERIA IMMAGINI

Categoria:

Genius is a postural unit, custom-made, adapted to the specific needs of the patient. It may have a maintenance, support, compensation and decubitus prevention function.

DESCRIZIONE PRODOTTO

Custom-made

It has an anatomical preformed basis, but, thanks to its customizable components, it can be made to measure for the specific needs of the user.

Elements for the customized configuration

Genius is an excellent postural element specifically thanks to the possibility to customize every its component. Made in our labs, it guarantees a proper position for both adults and pediatric users regardless of the pathology. It originates with specific basic configuration, but it can be modified into the following parts: semi-rigid basis cushion, abduction wedge, adductor wedges, lateral supports for the pelvis, breathable material 3DX ischial area, anti-decubitus material ischial area, total cushion cover with anti-decubitus material, and lining for incontinence.
