

# GENIUS BACK

Genius Back is a postural seatback for different types of users. This seatback can be perfectly adapted to the spinal column of the user thanks to an adjustable central section, increasing the support and comfort.

## Personalized

Genius Back is designed to accommodate the specific needs of scoliosis, kyphosis, hyperlordosis, etc., unloading the excessive pressure of some points on the spinal column. The seatback can be personalized through an extremely light and resistant shell made of aluminum; and it is compatible with headrests and resistant shell made of aluminum; and it is compatible with headrests and lateral supports. It is available in different heights and widths and it has a breathable liner to prevent humidity.

## Applicable to every wheelchair

Special joints make it possible to regulate height, depth and angle of the seatback, even when the user is on the wheelchair and without compromising or modifying the seat set up (depth and angle). Thanks to these joints that are easy to hook and unhook, this seatback is applicable to wheelchairs with 3/4", 7/8" and 1" tubes and it's fast to be removed.

## Lateral supports

The Swing Away lateral supports, with a universal joint system, act like hands' movement and they offer a full contact surface. They can be shaped and adjusted in height, width, depth and angle.

TECHNICAL DATA	
HEIGHT	WIDTH
LOW SEATBACK'S HEIGHT 25 cm	30-35-40-45-50-55 cm
